

sevyat®

"Uykunuz bize emanet"

NEW COLLECTION

EN

Everyone dreams of a comfortable sleep and Sevyat makes it happen.

We spend about a third of our lives sleeping, and the rest of it depends on how efficient and comfortable our sleeping hours are.

Sleep is the most basic need that affects both physiological and mental health. Therefore, it is the main factor affecting our quality of life. In the fast and stressful life conditions of the modern world, quality sleep is as important as other basic needs for a healthy body.

As Sevyat, we know the importance of sleep for human health and we produce ideal mattresses and complementary sleep products for you.. It is our priority to gain your satisfaction by producing quality and long-lasting products.

Our production adventure, which started 18 years ago, today extends to different parts of the world. Today, as Sevyat, we are proud of leading the sector and serving in 45 countries.

WE INVITE YOU TO WORLD OF CREATING AND
INSPIRING OF SEVYAT.

Intense

Intense where simple touches and modern lines come together, will change the soul of your bedroom. While the natural Mattress of Intense will change your understanding of comfort, the harmony of the stylish nightstands and the set will give your bedroom a simple and stylish look.

Intense

Fabric Code : **HERMES 10**

Intense

handmade

The Intense Mattress, which is basically designed for air circulation and optimum spine support. It offers a perfect sleeping experience with its natural layers and 7 Zone Pocket Spring Technology. Thanks to natural camel hair, linen fabric and latex layer, it creates a natural conditioning effect and prevents you from getting cold or sweating.

Linen

- Natural and Eco Friendly
- Provides comfortable sleep thanks to its cooling effect
- Has natural air permeability feature
- Has speckled and natural design

Natural Solution for Spine Problems

LATEX

Natural Solution for Back and Spine Problems
Latex is a unique filling material, in addition to its naturalness. Thanks to its flexible structure it absorbs excessive pressure and reduces the effect of turning movements during sleep, providing a much more comfortable sleep.

Natural Comfort Comes from Camel Hair

Natural Camel Hair Layer

Camel Hair regulates the thermal balance of your mattress and it prevents you from sweating in summer and prevents you from getting cold in winter.

Excellent Spine Support

7 Zone Pocket Spring Technology

7 Zone Pocket Spring Technology provides a comfortable sleeping experience thanks to its specially designed and individually packed springs which has different pressure level. It prevents being disturbed by involuntary turns during sleep.

Fresh Sense

Fresh Sense will make your life easier with functional bed and the nightstands. While its simple and stylish headboard modernizes your room, the fragrance effect specially designed mattress with pocket spring technology will change your perception of comfort.

Fresh Sense

Fabric Code : 176626

Fresh Sense

The smell of fresh bed sheet in the texture of the Fresh Sense mattress gives a fresh feeling with every touch. Fresh Sense Mattress produced with pocket spring technology, provide optimum support to your body curves and help you achieve the right sleeping position. Thanks to its medium density structure, it facilitates movement and prevents partners from being affected by each other's turns. Thanks to its double-sided use feature, you can use your mattress for many years without being deformed.

Fragrance Fabric Technology

Fresh Bed Sheet Smell

Fragrances are the use of essential oils to reinforce harmony and wellbeing of body, mind and spirit. The natural oils used are enclosed in small shells called microcapsules, realized in a special resin, and largely impermeable to diffusion. Thanks to this technology, these microcapsules can protect the natural essences from the strong industrial strain of fabrics during the normal standard textile finishing process.

Pocket Spring Technology

Correct Spine Support

Pocket Spring Technology perfectly adapts to different body types and provide the correct spine support by supporting the curves of body thanks to its individually packaged independent springs.

Maximum Pressure Distribution

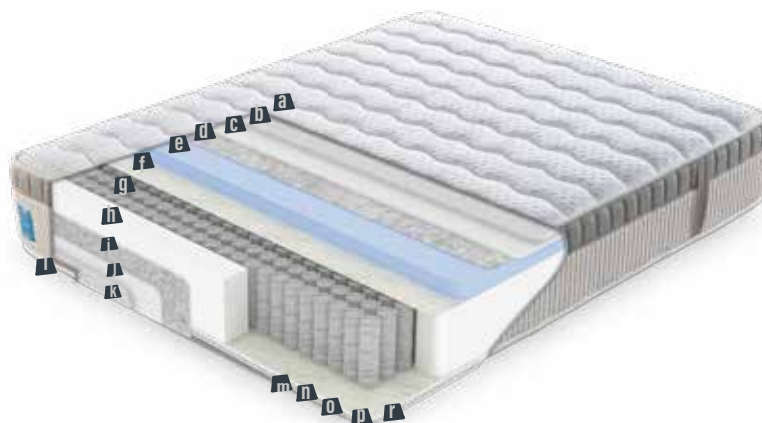

High Density Foam

It will help to maximize the pressure distribution due to its layers which has different level of hardness and intensity.

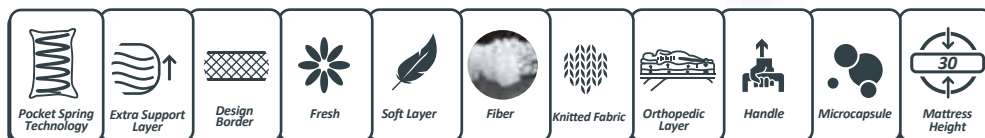

- The active ingredients of the plants are absorbed from our body and act directly on our psyche.
- The natural oils used are enclosed in small shells called microcapsules.
- Microcapsules can protect the natural essence.
- Small microcapsule shells release the natural essences and oils, which on release reinforce harmony and wellbeing of body, mind and spirit.

Quattro

Quattro mattress, produced with a bonnell spring system, creates a comfortable sleep environment by providing the necessary support to your spine with high-density layers that support the strong spring system. Silicon fiber with high air permeability in its content not only welcomes your body softly, but also facilitates air flow, preventing you from sweating and increasing your sleep comfort. Thanks to its 3D fabric on upper surface, It is not easily deformed and provides long-lasting use.

Bonnell Spring System

Strong Spring Support

Bonnell spring system is that the spring coils are spirally connected to each other with steel wires.

This system helps to ensure the longevity of your mattress by preventing the pressure from accumulating in a single area. In order to increase the quality of Sevyat Bonell springs, the wire thickness of the springs was increased to 2.38 mm. These mattresses are ideal to who love to sleep on firm or medium firm surfaces.,

Long Lasting Use

The Importance of Mattress Rotation

Medium-density support layers and comfort layers that support the strong spring system provide long-lasting use thanks to its double-sided use if you follow the mattress rotation correctly.

Moon

Moon designed for those who love minimal and simple designs. Moon offers you a special sleep experience with its specially textured linen fabric, functional base with high storage area and comfortable mattress with anti-static feature.

Moon

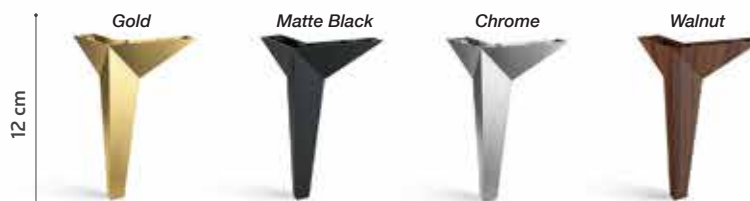

Fabric Code : LTC 580

133 cm

39 cm

Moon

Moon mattress produced with a bonnell spring system, provides the necessary support to the waist and spine thanks to its high density structure, allowing you to rest during sleep. Medium hard Moon mattresses help reduce back pain. The Carbon fabric of Moon Mattress has anti-stress feature. This special fabric helps you to wake up rested from sleep and start the day positively by removing negative energy from the body with its anti-stress and anti-static effect. The sleeping pad welcomes your body softly thanks to its high density structure. Although it is suitable for one-sided use, thanks to its strong spring system and high density structure, it provides long-lasting use if the mattress rotation is followed.

Thanks to the special components in its carbon structure, it creates an anti-stress and anti-static effect. Thus, it helps to remove stress and negative energy from the body and allows you to wake up rested from sleep.

One Side Use

REPREVE
Our Ocean

The strong bonel spring system, supported by layers of different hardness and density, supports your spine in the most ideal way. The Ocean mattress, which is an ideal choice for people suffering from joint pain, provides a clean sleeping environment thanks to its washable sleeping pad. In addition, it is aimed to benefit sustainability and the ecosystem by using Repreve Fabric, which is recycled from plastic waste collected from the oceans on its upper surface.

Our Ocean, Our Future

Oceans Our Future

Ocean pollution is at dangerous levels. At least 8.8 million tons of plastic are dumped into oceans and waterways every year. At current rates, oceans worldwide will contain one ton of plastic for every three tons of fish by 2025. And by 2050, it is estimated that there will be more plastic than fish.

OUR
OCEAN
OUR FUTURE

Take It Out, Clean It And Sleep

Washable Sleeping Pad

Thanks to its zippered structure, the washable sleeping pad has a structure that can be easily cleaned when needed. Thus, it provides long-lasting hygiene.

Maximum Pressure Distribution

High Density Foam

It will help to maximize the pressure distribution due to its layers which has different level of hardness and intensity and also strong spring system.

Vuitton

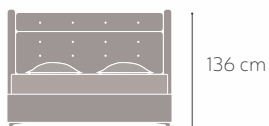

Vuitton stands out with its original details and contemporary design. Creating a different aesthetic perception with its modern style, Vuitton creates an authentic atmosphere in your bedroom with the fireplace details on its headboard.

Vuitton

Fabric Code : **SOFT TOUCH 35**

Vuitton

Vuitton mattresses produced with pocket spring technology provide proper support for your body curves and help you achieve the correct sleeping position. Thanks to its medium density structure, it facilitates movement and prevents partners from being affected by involuntary turns. Thanks to the visco gel layer it contains, it provides a quality sleep. In addition, visco gel absorbs unnecessary heat on the upper surface and provides thermal balance. The organic cotton fabric used on the upper surface wraps your body with its soft texture and leaves a soft feeling on your skin.

The Feeling of Refreshment Coming with Gelcell Visco Gel Comfort

High Density Visco Gel Layer provides a unique feeling of comfort. It absorbs the unnecessary heat on the mattress and creates a comfortable sleeping experience by balancing body temperature.

Choosing the Right Bed

Orthopedy

Contrary to what is known, the term orthopedics varies according to people's body types and characteristics. For this reason, Sevyat produces mattresses of different types and features.

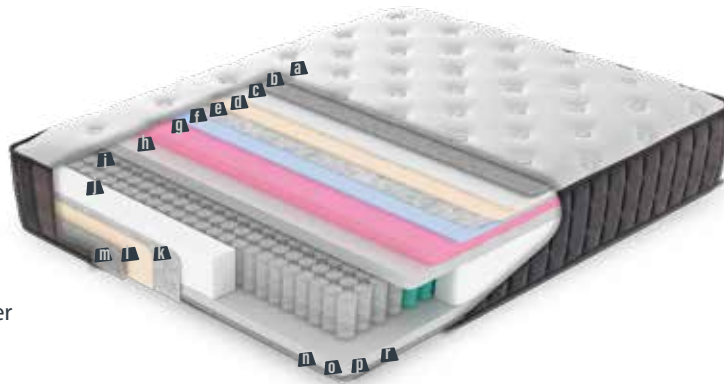

Excellent Spine Support

7 Zone Pocket Spring Technology

7 Zone Pocket Spring Technology provides a comfortable sleeping experience thanks to its specially designed and individually packed springs which has different pressure level. It prevents being disturbed by involuntary turns during sleep.

Lale

The bonnel spring system and high-density firm foams used eliminate the possibility of collapse in your bed and create a comfortable sleeping environment, especially for those who like to sleep on hard surfaces.

Bonnel Spring System

Strong Spring Support

Bonnel spring system is that the spring coils are spirally connected to each other with steel wires. This system helps to ensure the longevity of your mattress by preventing the pressure from accumulating in a single area. In order to increase the quality of Sevyat Bonel springs, the wire thickness of the springs was increased to 2.38 mm. These mattresses are ideal to who love to sleep on firm or medium firm surfaces.

One Side Use

Comfort Sleeping Pad

Comfort Sleeping Pad

Extra Pressure Distribution

The sleeping pad, which supports the high-density foams and strong bonnel spring system in its content, softly welcomes your body and increases your sleep comfort. These mattresses, which has a one-way use feature, protect its form for many years thanks to its strong spring system and high density foam layers.

Maximum Pressure Distribution

High Density Foam

It will help to maximize the pressure distribution due to its layers which has different level of hardness and intensity and also strong spring system.

Uykunuz Bize Emanet - Your Sleep is Entrusted To Us

bamboo

If you are looking for a breathable, odor- and bacteria-free comforter or pillow, a mixture of nanofibers and bamboo would be the right filler for you.

Bamboo, used as raw material for natural yarns, absorbs moisture very well and helps the body breathe by providing air permeability.

Being a natural cellulose fiber, bamboo is extremely soft and lightweight.

Bamboo is grown without the need for chemical pesticides or fertilizers, and is 100% natural.

Fabric:			Filling:		Size:	Quilt Size:
63tc	Bamboo: %65	Cotton: %35	Bamboo: %50	Micro Gel: %50	50x70cm	155x215cm 195x215cm 215x235cm

cotton

Cotton will take you back to your childhood with its soft and full structure, as it distributes heat evenly by releasing air during sleep and protects your body against changes in temperature.

Cotton fully maintains its thermal insulation properties even when it's wet, and adapts to changing temperatures during sleep thanks to its breathability. Cotton is a 100% natural material suitable for use across all four seasons.

Fabric:		Filling:	Size:	Quilt Size:
57tc	Cotton: %100	Cotton: %100	50x70cm	155x215cm 195x215cm 215x235cm

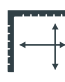

wool

Wool, one of the most frequently used heat-regulating materials for a sound sleep experience, is resistant to cold and heat.

Thanks to their durable fiber structure, wool pillows and comforters can be used for many years, absorbing and evaporating excess moisture in the environment, which provides you with a comfortable sleeping environment.

With an ability to absorb moisture up to 33% of its own dry weight, wool helps with heating in cold weather and cooling in hot weather. As such, you can use wool pillows and comforters for four seasons.

Fabric:	Filling:	Size:	Quilt Size:
 72tc	 Cotton: %100	 Wool: %100	 155x215cm 195x215cm 215x235cm

climate

The climate effect is an air control system discovered in sleep research, an ideal synthesis of nature and scientific studies.

Under normal conditions, rising body temperature causes sweating during sleep. As a result, as humidity increases gradually, the temperature continues to increase in parallel with the increase in humidity. The holes in the air control line of Climate keep the temperature and humidity in the sleeping environment at an optimum level.

As the moisture is drawn away from the bed, evaporating out of the air control holes as the air warms up and rises, cold air is prevented from entering by means of a double-channel ventilation unit.

It provides an air conditioning system that creates temperature and climate balance, especially for those who sweat during sleep.

Fabric:	Filling:	Size:	Quilt Size:
 Microfiber: %100	 Micro Gell: %100	 50x70cm	 155x215cm 195x215cm 215x235cm

cohen

Made of microfiber, Cohen possesses a light and soft form. Cohen has the ideal composition for those averse to heavy comforters. You will be sound asleep and wake up fully ready for a new day.

Fabric:	Filling:	Size:	Quilt Size:
 57tc	 Cotton: %100	 Microfiber: %100	 155x215cm 195x215cm 215x235cm
		50x70cm	

air comfort

With every breath you take in your sleep, it will breathe with you! All the materials you touch and come into contact with while sleeping support the quality of your sleep. Now imagine an alive tissue that is in contact with oxygen and breathes. It will provide you fresh sleep by breathing for you while making your own breathing easier. While the air spaces in the Aircomfort pillow provide extra softness, they also help you to feel the air flow in its own comfortable loop.

Aircomfort, which also prevents breathing problems that are a result of sleeping in the wrong position, will prepare you for a fresh, new day.

Technical Detail

Visco Aircomfort pillow is specifically designed for those who experience intense neck pain and fatigue.

Fabric:	Filling:	Size:
